(c) Persons not established as scrap dealers. Any person who is not but wishes to become a regular scrap dealer and therefore has no inventory of scrap must apply by letter to the War Production Board for permission to get an initial inventory in excess of one ton. This letter should state how much scrap he needs to start operating as a scrap dealer, the classes of persons he intends to buy from and sell to, and any other information to help the War Production Board decide whether he intends to become a regular scrap dealer.

(d) Prepared used tin cans. Except as provided in paragraph (g) no broker or dealer may accept delivery of any prepared used tin cans if his inventory of prepared used tin

cans is or will by virtue of the acceptance become more than 60,000 pounds.

(e) Tinplate scrap and used tin cans under M-325. In addition to the restrictions contained in this direction, Order M-325 imposes additional restrictions on delivery and acceptance of tinplate scrap and used tin cans.

IMPR 5981

POSTWAR HOUSEHOLD MECHANICAL REFRIGERATORS

In the judgment of the Price Administrator the maximum prices established by this Maximum Price Regulation No. 598 are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended; The Stabilization Act of 1942, as amended, and Executive Orders No. 9250, No. 9328, and No. 9599. ARTICLE I-SCOPE OF THIS REGULATION

SECTION 1. Articles covered. This regulation covers sales of new household mechanical refrigerators manufactured on or after July 1, 1945.

SEC. 2. Persons and transactions cov-This regulation covers all sales and deliveries by any person of house-hold mechanical refrigerators manufactured on or after July 1, 1945.

Sec. 3. Definitions. As used in this regulation:

(a) "Refrigerator" means any new household mechanical refrigerator of the type commonly used in the home which operates either by compression or by absorption and which has a food storage capacity of 16 cubic feet or less.

(b) "Manufacturer" means any person operating a plant or factory which manufactures or assembles refrigerators, or a person who regularly sells private brand refrigerators to distributors, or a person who sells to purchasers for resale private brand refrigerators, patterns or

dies for which he owns or controls.

(c) "Distributor" means any person who is not a "manufacturer" and who in the course of trade or business buys completed refrigerators for resale to persons other than ultimate consumers.

(d) "Dealer" means a person who buys completed refrigerators and resells them to ultimate consumers.

(e) "Ultimate consumer" means a person who purchases a refrigerator for

his own use.

(f) "Person" includes an individual, corporation, or any other organized group; their legal successors or representatives.

(g) "Class of purchaser" means any purchaser or group of purchasers to whom the seller had an established practice during the period October 1-15, 1941 of selling the same type of article at prices different from those charged other purchasers, or groups of purchasers. A class of purchaser may be a single purchaser or a kind of purchaser (for example, an exclusive distributor, mail order establishments, department stores, etc.) or purchasers located in a particular area (for example, a distributor in the New England States, etc.) or purchasers who buy in particular quantities (for example, dealers who buy in quantities of 5 or more) or purchasers who buy under particular conditions of sale (for example, 2% cash discount for payment within 10 days, net 30 days, long term credit, sales on a delivered basis, etc.)

Any purchaser, kind of purchaser or purchaser on certain terms or conditions of sale which the industry has generally recognized as constituting a separate class of purchaser, and for sales to which the seller does not have a ceiling price established by or under this regulation is a new class of purchaser for that seller. A manufacturer's ceiling prices for sales to a new class of purchaser must be established under Section 10 of this regulation.

ARTICLE II-MANUFACTURERS' CEILING PRICES

SEC. 4. Models which had ceiling prices on March 30, 1942-(a) Determination of ceiling prices. Unless an order issued under this regulation provides otherwise, a manufacturer's ceiling price for each model refrigerator is the price in effect to each class of purchaser on March 30, 1942. If, on that date, on any particular model, the manufacturer had a price in effect for sales to one or more classes of purchasers, but not for sales to others, then the ceiling price to the class of purchaser for whom the manufacturer had no price for that model shall be the price calculated by applying to his ceiling price to any class of purchaser for that model, the differential between the two classes which the manufacturer had

in effect October 1-15, 1941.

(b) Reports of ceiling prices deter-mined under this section. Every manufacturer for whom a ceiling price is fixed by this section must send to the Office of Price Administration, Washington 25, D. C., on or before November 10, 1945 a written report which states the model designation of each model so priced, the ceiling prices fixed for sales of this model. and the class of purchaser to whom each ceiling price applies.

SEC. 5. Repricing by special order. Refrigerators are a reconversion product for which adjustments in ceiling prices are found by the Administrator to be warranted in accordance with the reconversion pricing policy embodied in Amendment 67 to Maximum Price Regulation 188 and approved for industries not subject to Maximum Price Regulation 188 by Directive 78 issued by the Office of Economic Stabilization. Accordingly, orders may be issued under this section, adjusting ceiling prices established by section 4, to reflect legal increases (over 1941 factory costs) in the manufacturer's material prices and basic wage rate schedules of factory workers since October 1, 1941, together with a profit factor as determined by this Office equal to his own average net profit margin (before income taxes) for the period 1936-1939, or one-half the average industry profit margin for that period, whichever is higher. In determining the amount of any adjustment here authorized, the Office of Price Administration will act on the basis of the cost information called for on OPA Form 663-2445, calculated in accordance with the accompanying instructions.

Adjustments may be made under this section for manufacturers eligible to apply for an adjustment under Supplementary Order No. 119. Applications filed after November 10, 1945 will not be considered under this section but will be processed and adjustments granted in accordance with the terms of Supple-

mentary Order No. 119.

SEC. 6. New or changed models involving minor changes. (a) A manufacturer's ceiling prices for any model of refrigerator he produces which does not differ by more than a "minor change" from another model for which he has established ceiling prices are the ceiling prices of the model already priced. Any change which reduces the quality, efficiency, convenience, or safety of operation of the refrigerator being changed is not a "minor change".

(b) For the purpose of this regulation only the following changes are minor

changes

(1) Cabinet frame and panels, not in-

cluding the door:

(i) Changes in the gauge of sheet metal or modifications in the design of castings provided that the total net change does not amount to more than three pounds.

(ii) Changes in breaker strip or moulding materials except that the substitution of black strips or moulding for lighter colored materials is not a minor change. (iii) Changes in insulation materials.

(iv) Changes in finish except that substitution of synthetic enamel for porcelain enamel and reduction of the number of coats are not minor changes.

(2) Cabinet equipment and accessories:

(i) Changes in the location, material, or finish of evaporators except that the omission or addition of an evaporator door and any change that reduces or increases the cubic capacity of the cabinet more than 10% are not minor changes

(ii) Changes in shelf finish.

(iii) Changes in shelf arrangement which do not reduce or increase the total shelf area by more than 10%. Interchanging sliding and non-sliding shelves is not a minor change.

(iv) Changes in material for ice trays, except that any change which alters the tray capacity is not a minor change.

(v) Changes in design or location of defrost trays, meat keepers, hydrators and bins except that any change that alters the capacity of any of these items by more than 10% is not a minor change.

(3) Cabinet door and fittings:

(i) Changes in material, design, or

location of nameplates.

(ii) Changes in material or location of hardware except that changes in the cost of the hardware exceeding 25 cents are not minor changes.

(iii) Changes in gasket design or ma-

terial.

(4) Electric wiring and switches:

- (i) Changes in electric wiring, light and switches except that the elimination of any light or switch is not a minor change.
 - (5) Machine parts and controls:

(i) Changes in the location of the motor compressor, burner, tubing, re-strictor, condenser, control or relay. (ii) Changes in the kind of refriger-

ant used.

(c) A manufacturer who makes a minor change in any model of refrigerator shall keep available for the inspection of the Office of Price Administration for so long as the Emergency Price Control Act, as amended, remains in effect, a record of every such minor change, showing the model designation of the model being changed and a description of the minor changes being made.

SEC. 7. New or changed models involving a change; not a minor change—(a) Pricing formula. A manufacturer who cannot find his ceiling price for a new or changed model under section 4 or 6 or under any order issued under this regulation, but who has a ceiling price established for a comparable model, shall determine his ceiling price for the new or changed model according to the following formula:

(1) He shall find the model of refrigerator for which he has a ceiling price which is comparable to the model being priced. The "comparable" model is the one which is most like the refrigerator being priced in design, construction, and operation, which is closest to it in unit direct cost, and which is distributed through similar trade channels. If a refrigerator on which minor changes have been made is subsequently used as the comparable model in pricing a new or changed model, the cost of the comparable model shall be computed on the basis of the cost to make the refrigerator without the minor changes.

(2) He shall find the current unit direct cost of the comparable model. Current unit direct cost means the cost of direct materials and direct labor computed on the basis of (i) his normal production volume and his normal material prices practices; (ii) current material prices paid not to exceed ceiling prices; (iii) wage rates in effect at the time the report is prepared; (iv) labor efficiency and material waste allowances determined at the time of or just prior to the preparation of the report. For the purpose of this section, direct material and direct labor do not include any items of factory expense or burden, pattern and tool and die costs, production engineering, warehousing and shipping expense, royalties, and items of selling, general and administrative expense. If he is not producing the comparable model, he must, nevertheless, compute the current direct cost on the basis described above.

(3) He shall find the direct cost of the model being priced on the same basis as described in subparagraph (2) in a manner consistent with the computation of the current unit direct cost of the com-

parable model.

(4) He shall find his mark-up factor by dividing the ceiling price of the comparable model by its unit direct cost. He must use his ceiling price to the class of purchaser (distributors, dealers, mail order houses, etc.) who buys from him in the greatest volume.

(5) He shall multiply the unit direct cost of the model being priced by that mark-up factor. The result in his ceiling price to the class of purchaser used in subparagraph (4). His ceiling prices to any other class of purchaser for the model being priced must be calculated on the basis of the percentage differential which he had in effect during the period October 1-15, 1941 for sales to that class

of purchaser

(b) Reporting and waiting provisions. (1) If a manufacturer uses this section to find his ceiling price, he may not without special authorization sell, offer to sell, or deliver the refrigerator until his ceiling price has been approved by the Office of Price Administration. To receive that approval a manufacturer must comply with the reporting and waiting provisions

which are stated below.

(2) The manufacturer must report the price which he has arrived at under this section on OPA Form 6067-2620 provided for that purpose giving all the information called for by that form, or if he cannot do so, an explanation of the reasons he cannot. These forms may be obtained by him from the Office of Price Administration, Washington, D. C., and his report must be filed there. With the form he must include an illustration and specifications of both the new and comparable models. If he receives a written acknowledgment and approval of his report, he may proceed at once to sell the refrigerator at the reported price. Fifteen days after mailing the report (or all

additional information which may have been requested), in the absence of a contrary direction from the Office of Price Administration, he may treat his reported

price as his ceiling price.

The manufacturer may not, however, unless he is specifically authorized to do so, deliver any article priced under this section until he has ascertained the retail ceiling prices for the article and has complied with the tagging requirements of section 17.

SEC. 8. Downward adjustment of certain prices established or reported. Prices established or reported under sections 6 or 7 are subject to reduction at any time by written order of the Office of Price Administration if (1) the price appears to be out of line with prices established for similar models taking into account the manufacturer's relationships with other manufacturers during the base period, or (2) the price is too high in comparison with the manufacturing or selling conditions actually experienced, or (3) the price is found to be incorrect under the provisions of the applicable pricing method. Any reduction under this section will not be retroactive.

SEC. 9. Ceiling prices fixed by special order. If a manufacturer cannot apply the formula in section 7 because he has no comparable model, then his ceiling price for sales to a particular class of purchaser is the price specifically authorized by the Office of Price Administration for such sale, in line with the level of ceiling prices fixed by this regulation. Applications for the establishment of such prices must be made in writing to the Office of Price Administration, Washington 25, D. C. The manufacturer may not except in the case of sales to the U.S. or Allied Governments (see section 18 below), sell, offer to sell, or deliver a refrigerator for which a ceiling price must be fixed under this section prior to specific authorization by the Office of Price Administration.

Applications under this section shall contain a detailed breakdown of the unit direct costs of the new model (computed in the manner set forth in section 7 (a) (2)), a list of the major specifications of that model, a photo-graph or other illustration of that model, and the manufacturer's proposed ceiling prices for sales to each class of purchaser.

SEC. 10. Ceiling prices for sales to new classes of purchasers. If a manufacturer cannot find his ceiling price for sales to a particular class of purchaser under any of the preceding sections of this regulation, or under any order issued under this regulation, he shall apply for the establishment of ceiling prices or a method of determining his ceiling prices for sales to that class of purchaser. The application shall be made by letter to the Office of Price Administration, Washington, 25, D. C., and shall indicate the classes of purchasers for sales to whom prices are to be fixed.

In addition, the application shall set forth the manufacturer's proposed ceiling prices for those sales. An order will be issued under this section establishing ceiling prices or a method of determining

ceiling prices in line with the level of ceiling prices fixed by this regulation.

SEC. 11. Establishment of ceiling prices in certain cases. If a manufacturer is required by this regulation to file a report under section 7 or to apply for the establishment of a ceiling price under Section 9 or 10, and he fails to do so, or he fails to provide any of the information required in these sections, the Office of Price Administration may, on its own motion, issue orders under this section fixing ceiling prices for the manufacturer's sales in line with the level of ceiling prices established by this regulation. Ceiling prices so established will be effective as of the date of the first sale.

SEC. 12. Reports, catalogs and price lists. (a) Every manufacturer of articles covered by this regulation must notify the Office of Price Administration whenever he changes the model designation of any refrigerator in his line, and whenever he adds a new model to his line. This report may be made by letter and must give the model designation of both the model changed and the new model. This report must be mailed within three days after the change or addition is made. The reporting requirements of this subsection are in addition to, and do not supersede, the reporting requirements of section 4 of this regulation.

(b) Every manufacturer must file with the Office of Price Administration, Washington 25, D. C., a copy of every catalog and price list for refrigerators issued by him or in effect on or after March 30, 1942. In addition, every manufacturer must file a copy of every notification he issues to the trade after the effective date of this regulation concerning new prices, changes in prices, or changes in terms, discounts or allow-

Copies of these notifications must be filed within 10 days after they have been issued to the trade.

ARTICLE III-CEILING PRICES FOR RESALES BY DISTRIBUTORS AND DEALERS

SEC. 13. Establishment of resale prices for distributors by order. Whenever the manufacturer's ceiling prices for a refrigerator have been determined under this regulation, an order may be issued fixing ceiling prices, or a method of determining ceiling prices for sales of the refrigerator by distributors. Distributors' ceiling prices established by an order under this section supersede any ceiling prices established under any other provision of this regulation for those

SEC. 14. Distributors' ceiling prices. Unless the distributor's ceiling price for sales of a particular model of refrigerator to a particular class of purchaser has been established by an order issued under section 13, he shall determine his ceiling price under the first applicable rule of the following:

Rule 1. If the distributor quoted the identical model (or a model differing from it by minor changes only and priced under section 6) to the same class of purchaser at any time between March 30, 1942 and June 30, 1945, inclusive, he finds his ceiling price for such a sale as follows:

(a) He first ascertains his ceiling price fixed for that sale by Maximum Price Regulation No. 110, less any warehousing allowance included in it under § 1380.110 (b) (2) of that regulation.

(b) He then multiplies that figure by .987. The result is his ceiling price for that

sale under this regulation.

Rule 2. If the distributor quoted the identical model (or a model differing from it by minor changes only and priced under section 6) between March 30, 1942 and June 30, 1945, inclusive, but cannot use Rule 1 because he did not quote a price for sales of that model to that particular class of purchaser, then his ceiling price for that sale is his ceiling price to any other class of purchaser as de-termined under Rule 1 adjusted to reflect his differential in effect during the period October 1-15, 1941 on sales to that particular

class of purchaser.

Rule 3. If a distributor cannot use Rules 1 or 2, his ceiling price for a sale of a par-ticular model to a particular class of purchaser is the ceiling price established under Rules 1 or 2 for such a sale by his "most closely competitive seller of the same class." A distributor's "most closely competitive seller of the same class" is a distributor who (a) is selling the identical model of refrigerator to the same class of purchaser, and (b) is located nearest to the seller.

Rule 4. If a distributor cannot otherwise find his ceiling price for a particular sale, his ceiling price for that sale is the price established by the Office of Price Administration in an order under this section. An application under this rule shall state the name of the manufacturer of the refrigerator being priced, its model designation, the classes of purchasers to whom the applicant proposes to sell the refrigerator, the ceiling prices he proposes for such sales, and a statement of the reasons why he cannot use the other Rules in this section to fix his ceiling prices. Until ceiling prices are fixed for his sales by an order under this section, a distributor whose ceiling prices must be fixed under this rule may not make sales or deliveries of any model covered by his application.

SEC. 15. Dealers' ceiling prices-(a) Prices set forth in section 24, Appendix A. A dealer's ceiling price for sales of a particular model of refrigerator is the applicable price set forth in section 24, Ap-

pendix A.

(b) Credit charges. (1) Dealers who during the period October 1-15, 1941 collected a separately stated additional charge for the extension of credit on sales of refrigerators, may collect a charge for the extension of credit under this regulation, not exceeding such charge during the period October 1-15, 1941 on a similar sale on similar terms to the same class of purchaser. Dealers who did not so state and collect an additional charge, may collect a charge for the extension of credit only on install-ment plan sales; and the charge shall not exceed the separately stated additional charge for the extension of credit on a similar sale on similar terms to the same class of purchaser during the period October 1-15, 1941, by the dealer's closest competitor who made a separately stated

An installment-plan sale as used in the above paragraph means a sale where the unpaid balance is to be paid in installments over a period of either (i) six weeks or more from the date of sale in the case of weekly installments, or (ii) eight weeks or more in the case of other than weekly installments.

(2) All charges for the extension of credit shall be quoted and stated separately. Any charge which is not quoted and stated separately or which otherwise does not conform to this subsection, shall, for the purposes of this regulation, be considered to be part of the price charged for the refrigerator sold.

(3) No dealer may require as a condition of sale that the consumer must buy

on credit.

ARTICLE IV-GENERAL PROVISIONS

Sec. 16. Sales invoices. Every manufacturer, distributor, and dealer who sells a refrigerator after October 22, 1945, shall furnish every purchaser with an invoice showing the date of sale, the name and address of both the buyer and seller, the model number of each refrigerator he sold, the price charged, the quantity of each model sold, the terms of sale, and the nature and amount of any additional charges. Every seller must keep a copy of every sales invoice available for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

Sec. 17. Tagging. (a) No person may sell at retail any refrigerator covered by this regulation unless there is attached to the refrigerator a label containing the OPA retail ceiling price for sales of the

refrigerator by the seller.

(b) On and after November 7, 1945, no manufacturer may ship any refrigerator covered by this regulation to a distributor or dealer unless there is attached to the inside panel of the refrigerator door a label containing the OPA retail ceiling price of the refrigerator, a description of the area in which that price is applicable. the brand name and model designation of the refrigerator, a statement that the price includes delivery, five-year warranty, federal excise tax and installation to facilities provided by the consumer and a statement that the label may not be removed until after the refrigerator is delivered to the ultimate consumer.

SEC. 18. Sales to the United States and Allied Governments. (a) The ceiling price for sales to any agency of the United States Government or to any Allied Government by any seller other than a manufacturer of any refrigerator covered by this regulation shall be the seller's lowest ceiling price for sales of

the refrigerator.

(b) A manufacturer may sell and deliver, and tentatively collect a price for, any refrigerator which is sold by him directly to any agency of the United States Government or to any Allied Government prior to the establishment of a ceiling price for sales by the manufacturer to that class of purchaser. The manufacturer must, however, inform the buyer that the ceiling price is still to be established under this regulation, and he must refund any amount collected which is in excess of the ceiling price approved or established by the Office of Price Administration. Within ten days after the manufacturer has entered into a contract for such a sale, he must file a report or an application as provided in sections 7, 9, or 10, whichever is applicable.

SEC. 19. Terms of sale. Unless this regulation or an order issued under it provides otherwise each ceiling price established by or under this regulation is subject to each seller's terms, allowances, discounts and price differentials no less favorable than those he had in effect for similar sales during the period October 1–15, 1941.

SEC. 20. Relation of this regulation to other price regulations. (a) The provisions of Revised Price Schedule 102 and Maximum Price Regulation No. 110 do not apply to sales and deliveries covered by this regulation except that all records which sellers were required to retain under those regulations must be kept and made available by them for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

(b) The ceiling price at which any article covered by this regulation may be exported by any person shall be determined in accordance with the provisions of the Second Revised Maximum Export

Price Regulation.

SEC. 21. Modification of provisions of this regulation. The provisions of this regulation as applied to classes of commodities or persons subject thereto may be modified by orders of general applicability issued under this section.

Orders may also be issued under this section, at the request of a manufacturer, altering his zoning practices and prices, and those of his distributors accordingly, when it appears that no increase in the general level of prices for refrigerators will result.

Sec. 22. Compliance with the regulation—(a) No buying or selling at over ceiling prices. Regardless of any contract or other obligation no person shall sell, offer to sell, or deliver, and in the course of trade or business, no person shall purchase or accept delivery of any refrigerator covered by this regulation at a price higher than the ceiling price fixed by this regulation, or before the manufacturer has properly determined his ceiling price under this regulation.

If, in violation of this provision, a sale, offer to sell, or delivery of a refrigerator covered by this regulation is made before its ceiling price has been properly established in accordance with this regulation, the ceiling price applicable to the sale, offer to sell or delivery, shall be the correct ceiling price for the refrigerator properly determined in accordance with this regulation.

(b) Enforcement. Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, license suspension proceedings, and suits for treble damages provided by the Emergency Price Control

Act of 1942, as amended.

(c) Licensing. The provisions of Licensing Order No. 1 licensing all persons who make sales under price control are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

(d) Certain practices forbidden. Any practice which has the effect of getting a higher-than-ceiling price without actually raising the dollar and cents price is hereby forbidden.

The following is an illustrative list of the things a seller is not permitted to do. A seller is not permitted to require the purchaser, as a condition of the sale or transfer of the new refrigerator, to make payment over a period of time; to require him to finance the purchase through any particular lending agency; to require him to purchase any equipment, accessories, repairs, parts, or services so as to increase the total compensation above the new refrigerator maximum price; to require him to purchase any other commodity or service; or to require him to make payment in whole or in part by exchanging, transferring or trading in any other product or commodity. Where there is an exchange, transfer, or trade-in in connection with a sale, it is a violation for the seller to give the purchaser an allowance for the product or commodity exchanged, trans-ferred, or traded in which is less than its reasonable value.

Furthermore, the seller is prohibited from providing for the purchase of the new refrigerator by a lessee under a retail contract at an agreed valuation which together with the amount paid for the rental is higher than the applicable maximum price at the time the rental contract is entered into, and from making the terms and conditions of sale more onerous to purchasers than they customarily have been except to the extent

allowed by this regulation.

It shall also be a violation for any person to charge, pay or receive a finder's fee or other compensation in connection with the procurement of a new refrigerator where the finder's fee or other compensation plus the purchase price for the new refrigerator exceeds the permitted maximum price, except that this prohibition shall not apply to the case of a bona fide employer-employee relationship between a seller generally engaged in the business of selling new refrigerators and an employee of the type of employee generally considered by the trade to be a new refrigerator salesman.

Sec. 23. Geographical applicability. The provisions of this regulation shall be applicable to the 48 States and the District of Columbia.

SEC. 24. Appendix A: Ceiling prices for dealers' sales of refrigerators. The ceiling prices for sales by dealers of the refrigerator models listed below are the applicable prices listed in this appendix.

These prices include:

(1) Delivery.

(2) The five-year warranty.(3) The Federal Excise Tax.

(4) In the case of an electric refrigator, installation to electric facilities provided by the consumer, or, in the case of a gas refrigerator, installation to gas facilities provided by the consumer if the installation does not require the dealer to provide more than five feet of pipe or tubing.

They do not include state or local taxes imposed at the point of sale. No charge

may be added for the extension of credit by the dealer to the ceiling prices in this appendix except in accordance with paragraph (b) of section 15 of this regulation.

The zones shown in the table vary from

brand to brand.

Zone boundaries, where more than one zone price is listed, are those shown on maps on file with the Office of Price Administration.

This regulation shall become effective on October 22, 1945.

NOTE: All reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of

Issued this 22d day of October 1945.

PART 1351-FOOD AND FOOD PRODUCTS [FPR 1,1 Amdt. 3 to Supp. 13]

PACKED FRUITS, BERRIES AND VEGETABLES (1945 AND LATER PACKS)

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.

Supplement 13 to Food Products Regulation No. 1 is amended in the following respects:

1. The second undesignated paragraph in section 4 (b) is amended to read as follows:

For sales to government procurement agencies, the processor figures his maximum price by taking 96% of his maximum price for sales to purchasers other than government procurement agencies, after it has been increased, in the case of subsidized commodities, by the amount of the direct subsidy payable per unit of the finished product.

2. In section 5 (a), the undesignated paragraph immediately preceding subparagraph (1) is amended to read as follows:

The processor who performs the wholesale function with respect to the item being priced (that is, by warehousing and selling it in less-than-carload quantities, from a branch warehouse owned or controlled by him, to retailers or to commercial, industrial or institutional users) shall, in each case, figure his maximum price for sales in this manner under the general pricing methods of this paragraph (a). However, in determining his base price, he shall include only sales made in this manner in the base period. Furthermore, in each case before applying the limitations of the price range, he shall adjust the applicable price range by adding to the top and bottom prices the freight, if any, incurred from factory to branch warehouse and multiplying each of the resulting figures by the markup named in Maximum Price Regulation No. 421 1 for cash-and-carry wholesalers or for service wholesalers, depending on whether delivery is made in the particular sale to the buyer's place of business.

The processor who qualifies as a retailer under Maximum Price Regulation No. 422 ° or 423 ° shall not use the pricing methods of this section, but he shall apply to the Office of Price Administration, Washington, D. C., for authorization of a maximum price under section 10 (c).

3. The last sentence in the first paragraph of section 5 (a) (1) (i) is amended

1 10 F.R. 11118, 11578, 11748.

to read as follows: "However, the following sales contracts shall be excluded, even when made during the base period: Sales to the armed forces of the United States; sales by a processor to his employees, to growers who supplied the raw material, or to other processors of the product unless at least 33 1/3 percent of his 1941 pack of the product was sold to other processors, all regardless of brand; sales of damaged goods or of goods packed for experimental purposes; and sales to retailers or institutional users in quantities of less than 25 cases (basis No. 2 cans for vegetables and basis No. 21/2 cans for fruit) unless at least 10% of the processor's 1940 or 1941 pack of the product was sold in such lesser quantities."

4. In section 5 (a) (2) the following paragraph is added immediately following item 8 of the list of the order in which steps are to be taken:

When pricing substandard grade of any item under subparagraph (2) or (4), the conversion for grade ordinarily made under step 3, above, must be taken immediately following step 4 and before step 5, since no price ranges are provided for substandard grade.

- 5. In section 5 (a) (4), First situation. the text of subdivision (iii) is amended to read as follows:
- (iii) Next, the processor shall convert the price so figured for the selected item (for variety, style, sieve size, syrup differential, and grade, in the order named) as may be necessary to arrive at a gross maximum price (except for container size) for the item being priced, by applying the conversion factors named in the applicable appendix, and by applying to the resulting figure the limitations of the applicable price range. The price so figured shall then be converted for container type and size to a gross maximum price for the item being priced by applying the conversion factors named in the applicable appendix.
- 6. In section 5 (a) (4), Second situation, the text of subdivision (iii) is amended to read as follows:
- (iii) Next, the processor shall convert the price so figured for the selected item (for variety, style, sieve size, syrup differential, and grade, in the order named) as may be necessary to arrive at a gross maximum price (except for container size) for the item being priced, by applying the conversion factors named in the applicable appendix, and by applying to the resulting figure the limitations of the applicable price range. The price so figured shall then be converted for container type and size to a gross maximum price for the item being priced by applying the conversion factors named in the applicable appendix.
- 7. In section 6 the note immediately following the first undesignated paragraph and immediately preceding the list of products is deleted.

8. The list of products in the text of section 6 preceding paragraph (a) is amended in the following respects:

For the reasons set forth in the statement of considerations and by virtue of the authority vested in me by the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250, 9328, 9599 and 9620, I find that the issuance of this amendment, insofar as it establishes maximum prices for packed pears based on the raw material prices specified herein, is necessary to aid in the effective prosecution of the war.

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.

Supplement 13 to Food Products Regulation No. 1 is amended in the following respects:

1. In section 5 (a) (2) the first undesignated paragraph is amended to read

As a general rule, in figuring maximum prices under subparagraph (2), (3), or (4), steps are to be taken separately in the following order (in many cases not all of the steps are necessary). Any variation from this order will be explained in the applicable appendix.

2. In section 15, Appendix D is amend-

ed in the following respects:
a. Paragraph (d) of the "Explanation" is amended to read as follows:

(d) Conversions for style of pack, grade and sieve size. In each case of conversion from one style of pack (whole or cut but not asparagus (horizontal or vertical) or French style), grade, and sieve size (including ungraded), to another style of pack, grade and sieve size (including ungraded), conversion for any two of these factors, conversion only from one sieve size to another sieve size of the same style of pack and grade, or conversion only from one style of pack to another style of pack of the same sieve size and grade, the processor shall figure the conversion (in one step) by taking the difference between the specific dollars-and-cents maximum prices named in Table 4 for the two items and either adding it to or subtracting it from the constructed base price as the situation requires, depending on whether the dollars-and-cents price named in Table 4 for the item being priced is higher or lower than that for an item (of the same sieve size and grade) from or to which the conversion is being made. If the conversion is for grade only,

Supplementary Regulation 14E is amended in the following respects:

1. Section 2.12 is added to read as fol-

SEC. 2.12 Distributors' maximum prices for certain surgical dressings. Distributors' maximum prices established by the General Maximum Price Regulation for the surgical dressings designated below are increased by 5¢ per lb. The increase is applicable to the weight of the grey cloth in the following bulk surgical dressings composed of bleached gauze: (a), absorbent gauze (put up in 100 yard bolts or ready cut gauze or dressing rolls), (b) bandage rolls, (c) hospital crinoline, (d) sponges, and (e) abdominal packs.

2. Section 2.9 is amended to read as follows:

SEC. 2.9 Producers' maximum prices for certain cotton rope, twine, yarn and cord. The maximum price of each producer prevailing on November 23, 1944,2 for cotton rope and for yarn (excluding dyed yarns), twine and cord (excluding cotton tire cord, tire cord fabric, and cord breaker fabric) not subject to Maximum Price Regulation No. 33,8 made entirely (except for other material used in the core) of cotton and/or cotton waste, is increased by 23/4¢ per lb. of cotton and/or cotton waste content in the rope, yarn, twine, or cord.

This amendment shall become effective October 24, 1945.

² For producers who prior to November 23, 1944, made sales subject to Maximum Price Regulation No. 157, this maximum price for sales and deliveries to any War Procurement Agency (as defined in MPR-157), shall be (a) the ceiling price then prevailing under that regulation, or (b) if, by virtue of proper certification under § 1378.4 of that regulation the producer had no ceiling, the price last negotiated prior to that date. For producers who between November 23, 1944, and February 16, 1945, inclusive, for the first time made sales subject to MPR-157 and by virtue of proper certification under § 1378.4 of that regulation had no ceiling, the maximum price for sales and deliveries to any War Procurement Agency (as defined in MPR-157) shall be the lowest price negotiated during that period but the increase to be added thereto shall be only 134¢ per pound.

the conversion shall be figured under Table 8. For example, the Y Company, whose factory is located in Area 1, sold only No. 3 sieve Fancy whole snap beans in No. 2 cans during the base period, and is now pricing No. 4 sieve Extra Standard cut snap beans in No. 2 cans. To figure the conversion for style of pack, grade, and sieve size the company takes the difference between the dollars-and-cents prices named in Table 4 for the two items (\$1.56 minus \$1.27 equals \$0.29). Because the company is pricing an item with a lower dollars-and-cents price than that named for the item (of same grade and sieve size) from which the conversion is being made the \$0.29 differential is subtracted from its constructed base price in making the conversion for style of pack, grade, and sieve size.

FIRE EXTINGUISHING EQUIPMENT

Section 27.3-3 Machinery spaces is amended by changing the section heading to read as follows:

§ 27.3-3 Machinery spaces and tank spaces.

Section 27.3-3 (c) is amended to read as follows:

§ 27.3-3 Machinery spaces and tank spaces.

(c) All vessels using fuel having a flash point of 110° F. and lower and all vessels of more than 300 gross tons regardless of the flash point of the fuel used shall be fitted with an approved carbon dioxide fixed system in the machinery space. In addition all vessels using a fuel having a flash point of 110° F. and lower shall be fitted with an approved carbon dioxide fixed system in the fuel tank space.

The center heading over § 27.4-1 "Carburetor Backfire Flame Arrestor" is deleted and the following is substituted therefor:

INSTALLATION REQUIREMENTS FOR VESSELS USING LIQUID FUELS STORED AT ATMOSPHERIC PRESSURE AND TEMPERATURE AND HAVING FLASH POINTS OF 110° F. OR LOWER

Section 27.4-1 Where required is deleted and new §§ 27.4-1 to 27.4-4 inclusive are substituted therefor, reading as follows:

§ 27.4-1 Machinery and exhaust pipe. All installations shall be of marine type engines designed for rugged service. The following requirements shall govern all installations and be effective on new vessels or vessels converted to passenger service for the first time, construction of which is commenced on or after December 1, 1945, and to all existing vessels in so far as practicable:

(a) Drip collectors under carburetors. All carburetors, except the down draft type, shall have integral therewith or properly connected thereto, a drip collector of adequate capacity which shall be so arranged as to permit ready removal of fuel leakage and to prevent such leakage from reaching the bilge. Drip collectors shall be covered with flame screens.

(b) Backfire flame arrestors. All carburetors of every engine installed on all motorboats and motor vessels after April 25, 1940, shall be fitted with approved backfire flame arrestors and air intakes shall be so directed that backfire cannot blow down into the bilge.

(c) Exhaust manifold. The exhaust manifold shall either be water jacketed and cooled by discharge from a pump which operates whenever the engine is running or woodwork within 9 inches shall be protected by ½ inch asbestos board covered with not less than #22 USSG galvanized sheet iron or non-ferrous metal. A dead air space of ¼ inch shall be left between the protecting asbestos and the wood, and a clearance of not less than 2 inches maintained between the manifold and the surface of such protection.

(d) Exhaust pipe. The exhaust pipe shall be gas tight and the installation shall comply with one of the following requirements:

(1) All of the engine cooling water shall be discharged through the exhaust pipe and this water shall enter the exhaust pipe at a point as near to the manifold as practicable.

(2) A length of not less than 12 diameters of the exhaust pipe adjacent to the manifold shall be water jacketed and cooled in the same manner as the manifold. The remainder of the pipe shall be kept clear of internal woodwork at least 1½ inches.

(3) Woodwork within 6 inches of any part of the exhaust pipe shall be protected by 1/4 inch asbestos board covered with not less than #22 USSG galvanized sheet iron or non-ferrous metal. A dead air space of 1/4 inch shall be left between the protecting asbestos and the wood, and a clearance of not less than 1/2 of its diameter shall be maintained between the pipe and the surface of such protection.

In all of the above cases the exhaust pipe shall be properly supported by non-combustible hangers or blocks and protective gratings shall be provided at such locations where persons or gear might come in contact therewith. Arrangements shall be made to provide access to the exhaust pipe throughout its length.

(e) Exhaust pipe bends, packing at bulkheads. Where exhaust lines pass through watertight bulkheads, non-combustible packings shall be installed. Exhaust piping shall be led to the point of escape without traps and with a minimum number of bends and elbows. 90° elbows or bends of less than 5 diameters radius are not permitted.

(f) Flexible exhaust pipe. Where flexibility is desirable a section of flexible metallic hose, or suitably reinforced rubber pipe, may be used in the exhaust

§ 27.4-2 Fuel tanks and piping. The following requirements shall govern all fuel tank and piping installations and be effective on new vessels or vessels converted to passenger service for the first time, construction of which is commenced on or after December 1, 1945, and to all existing vessels in so far as practicable:

(a) Fuel tanks, location. Fuel tanks shall be located in watertight compartments separate from but adjacent to the engine room, and accessible for exterior examination. The fuel tank installation shall be such that the tank or tanks may be lifted for periodic examinations.

(b) Portable fuel tanks. Portable fuel tanks are not permitted.

(c) Construction of fuel tanks. Construction of fuel tanks shall comply with the following:

(1) Materials shall consist of copper of thickness not less than #18 USSG or of iron or steel of thickness not less than #14 USSG. Non-corrosive alloys or other non-ferrous metals may be used subject to approval. Steel or iron tanks shall be galvanized both inside and outside by the hot dipped process after completion.

(2) Seams of fuel tanks shall be riveted, welded, or brazed, except that rolled and soldered joints may be used on small tanks of 20 gallons or less capacity provided the solder has a melting point of not less than 450° F.

(3) Tanks shall be designed with a factor of safety of not less than 4 based on the test head. Tanks shall be tested by static head above tank top of 10 feet of water without showing leakage or permanent deformation.

(4) Swash plates of the same material as the tank shall be fitted where necessary.

(5) Gauge glasses or try cocks are prohibited.

(d) Outlets and drains. Outlets in fuel lines for drawing loose gasoline for any purpose are prohibited. Drains or any openings in the bottom of fuel tanks are prohibited.

(e) Connections at tank, fuel suctions. All outlets shall pass through the top of fuel tanks and connections shall be fitted into spuds. These spuds shall either be riveted and soldered, welded, or brazed to the tank. Fuel suction lines shall run inside to near the bottom of the tank.

(f) Filling pipes and sounding tubes. Filling pipes and sounding tubes shall be so arranged that vapors or possible overflow when filling cannot escape to the inside of the hull but will run overboard. A pipe made tight to the tank and to the filling plate on deck clear of any coamings, etc., meets this requirement. Filling and sounding pipes shall extend to within 1/2 their diameter from the bottom of the tank or from the surface of the striking plate in case of a sounding pipe. A flame screen of non-corrodible wire mesh shall be fitted in the throat of the full pipe. Sounding tubes shall be kept closed at all times except during the act of sounding.

(g) Vent pipes. The net area of the vent pipe shall equal that of the fill pipe. Two vents or reliefs having a combined area equivalent to that specified above may be used in place of a single vent. Terminations of vent pipes shall be at least two feet above the deck and not less than three feet from any opening into living quarters or other below deck space. These terminations shall be fitted with flame screens.

(h) Flame screens. The term "flame screen" as used in paragraphs (f) and (g) means a single screen of corrosion resistant wire of at least 30 x 30 mesh, or two screens, both of corrosion resistant wire of at least 20 x 20 mesh, spaced not less than ½ inch nor more than 1½ inches apart.

(i) Auxiliary feeds. Auxiliary machinery shall either be supplied by branches from the main fuel line or from auxiliary fuel tanks which shall also meet the requirements previously outlined for main fuel tanks regarding location, construction, outlets, fill pipes, and vent pipes

(j) Shut-off valves. A shut-off valve shall be installed in the fuel line as close to each tank as practicable and one as close to each carburetor as practicable. Arrangements shall be provided for operating all shut-off valves from outside the compartments in which they are located, preferably from on deck. The operating gear for the shut-off valves shall be accessible and in efficient working condition at all times. In addition a heat actuated device shall be located in the fuel line near the tank to automatically shut off the fuel supply in event of fire.

(k) Strainers. A suitable twin strainer shall be fitted in the fuel suction line within the engine compartment and this strainer shall be supported to take its weight off the line. Strainers shall be of the type opening on top for cleaning screens. A drip pan shall be fitted under the strainer.

(1) Materials, sizes, and workmanship of piping, valves and fittings. (1) Seam-

less drawn annealed copper tubing or iron pipe size copper pipe shall be used for all fuel lines. They shall be run in sight whenever practicable, protected from mechanical injury, and effectively secured against vibration by neat fitting soft non-ferrous metal clips with no sharp edges in contact with tubing. Where passing through steel decks or bulkheads, fuel lines shall be protected by close fitting ferrules of non-abrasive material or stuffing boxes. A short length of suitable flexible tubing or a loop of copper tubing shall be installed in the fuel line at or near the carburetor to prevent damage by vibration.
(2) Tubing wall thicknesses shall be

not less than the following:

V	Thickness		
Outside diameter of tubing	B. W. G.	Inches	
16, 3fe, 14	#21 #20 #19	0.032 .035 .042	

(3) Tube fittings shall be of non-ferrous drawn or forged metal and of the flared type and at least equal to the "S. A. E." Standard Practice Code for Refrigeration and Marine." Tubing shall be cut square and truly flared by tools designed for these purposes. Tube ends shall be annealed before flaring. Pipe fittings shall be of non-ferrous metal standard pipe threaded. Pipe thread joints shall be made tight with a suitable compound.

(4) Valves for fuel line shall be of non-ferrous metal of the union bonnet type with ground seats and they shall be installed to close against the flow. Cocks of any type are not permitted for use in

§ 27.4-3 Bulkheads. Machinery and fuel tank spaces shall be separated from accommodation spaces and from each other by vapor tight bulkheads (double diagonal wood, plywood, steel plate, or equivalent construction). These bulkheads shall extend completely to the bottom of the vessel and shall be effectively secured to the frames or the vessel's hull so as to efficiently seal off engine room and tank space bilges from accommodation spaces. These requirements shall be effective on new vessels or vessels converted to passenger service for the first time, construction of which is commenced on or after December 1, 1945. and to all existing vessels in so far as practicable.

§ 27.4-4 Ventilation. Every compartment in which an engine or fuel tanks are fitted shall be provided with adequate inlet ventilation ducts and induced exhaust blowers in accordance with these regulations. The following ventilation requirements shall govern all installations and be effective on new vessels or vessels converted to passenger service for the first time, construction of which is commenced on or after December 1, 1945, and to all existing vessels in so far as practicable:

Exhaust blower motors shall be outside of the ducts and if mounted in the compartment ventilated the motors shall be of the "explosion proof" types. Blower blades shall be non-sparking with reference to their housing. Exhaust blower switches shall be located outside the compartment ventilated and shall be of the type interlocked with the ignition switch so that the blowers are started before the engine ignition is switched on. A red warning sign at the switch shall state that the blowers shall be operated prior to starting the engines a sufficient period of time to insure one complete air change in the compartments ventilated.

(b) Size and shape of ducts. The area of ducts shall be such as to limit air velocity to a maximum of 2,000 feet a minute. Ducts may be of circular, rectangular, oval, or other regular section: Provided, That in no case shall one dimension exceed twice the other.

(c) Location and lead of ducts. The two inlet ducts shall be located at one end of the compartment and they shall lead to the lowest part of compartment or bilge on each side. Ducts shall lead to the exhauster from the lowest part of compartment or bilge on each side of the compartment at the end opposite from that at which the inlet ducts are fitted.

(d) Construction of ducts. Ducts shall be constructed of non-ferrous metal or galvanized ferrous metal not less than #22 USSG, intact and gas tight from end to end and shall be of substantial construction. The ducts shall lead as direct as possible and be properly fastened and supported.

When cowls or scoops are screened the mouth area shall be increased to compensate for the area of the screen wire. Dampers shall not be fitted. Cowls or scoops are to be kept open at all times except when the stress of weather is such as to endanger the vessel if these openings are not temporarily closed. Inlet and exhaust openings shall not be located where the natural flow of air is unduly obstructed or adjacent to possible sources of vapor ignition, nor shall they be so located that exhaust air may be taken in the inlet vents.

(a) Grades of boards, dimension, planks and timbers. (1) First grade is used lumber in the form of boards, dimension, planks or timbers which are at least 5' in length, and which are sound, strong, of uniform width and thickness, suitable for substantial construction purposes, free from loose or rotten knots, knot holes and rot, and without other defects which might materially impair the strength of the piece, from which all nails, bolts, cement, plaster or other foreign matter have been removed, and which has been surfaced to standard or special patterns.

(2) Secondary grade is used lumber in the form of boards, dimension, planks or timbers, which individually are at least 5' in length, and which though failing to qualify as first grade are reasonably good construction lumber. They must be free from rot, but may contain loose knots. knot holes or other defects which do not interfere with their use for construction purposes, from which all nails, bolts. cement, plaster or other foreign matter have been removed, and which has been surfaced to standard or special patterns. Each piece of used lumber sold as secondary grade must show more than 50 percent of first grade used lumber in lengths of at least 5 feet.

(3) Third grade lumber is used lumber meeting the general requirements of first and/or secondary grades but from which nails, bolts, cement, plaster or other foreign matter have not been removed, and used lumber which does not meet the requirements of first or secondary grades, and which has been surfaced to standard or special patterns.

(b) Grades of flooring. (1) Re claimed flooring is used flooring of 25/32 (1) Reor 13/16" thickness, entirely free of nails or other foreign matter and with upper face whole or free from voids or splits. A tolerance of 1/3" in thickness will be permitted where flooring is worn or sanded. Not more than 25 percent of the tongue may be missing on any piece nor more than 25 percent of the lower surface representing the upper part of the groove.

(2) Unreclaimed flooring is used flooring which meets the specifications for reclaimed flooring except that nails or other foreign matter have not been re-

moved.

SEC. 5. Persons. The term "person" includes an individual, corporation, partnership, association, or any other organized group of persons, or their legal successors or representatives; the United States, or any government, or any of its political subdivisions, or any agency of the foregoing.

SEC. 6. Sales. "Sale" includes a barter. exchange, lease or transfer, and an agreement or offer to sell, barter, exchange, lease or transfer.

SEC. 7. Established yard. Seller's established yard means premises occupied by the seller for the purpose of regularly and continually maintaining a stock of new and/or used lumber from various unrelated sources of supply.

Article III-Specific Requirements

SEC. 8. Posting ceiling prices. Every person selling used lumber for delivery in, or from stocks located in, the area covered by this order shall obtain from the Office of Price Administration at least two copies of the price schedule fixed in this order. One copy of such order must be posted and maintained in a prominent place at or near each location in the area where used lumber is offered for sale, in such manner that it can be easily read, and that purchasers can approach it within a distance of two feet. One other copy must be kept available so that it may be shown to and read by any customer at his request.

Sec. 9. Sales slips and receipts. Where a sale of used lumber is covered by this order and the total price of the sale is \$5 or more, the seller shall, regardless of his previous practice and whether or not requested by buyers, give to the buyer a sales slip, bill, receipt, or other written evidence of the sale, setting forth the following:

Name and address of seller.

Buyer's name. Place of delivery.

Location from which stock is sold (seller's yard or site other than seller's yard).

Description of items sold and itemized prices (in terms of categories, grades, lengths, quantities and any other specification affecting the price). Total price.

Additions (for delivery or other extra).

SEC. 10. Records and reports. Every person who makes a sale of used lumber shall keep a record of such sale showing the name of the buyer and place of delivery, date of the sale, the grades sold, the quantities sold and the price charged in the same detail as required in section 9. Such records shall be kept for a period of 2 years or for the duration of the Emergency Price Control Act of 1942, as amended, whichever be the shorter.

Article IV-Prohibited Practices and Penalties

SEC. 11. Sales of used lumber at higher than maximum prices prohibited. (a) On and after the effective date of this order, regardless of any contract or obligation, no person shall make a sale or delivery of used lumber of the varieties covered by this order and no person shall buy or receive such used lumber under a sale, at prices higher than the maximum prices fixed by this order; and no person shall agree, offer, or attempt to do any of these things.

(b) Prices lower than the maximum prices may, of course, be charged and

paid.

SEC. 12. Prohibited practices. Any practice which is designed to get the effect of a higher than ceiling price is as much a violation of this order as a direct over-the-ceiling charge. This applies to changes in credit practices and cash discounts and to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings and the like. Such practices include, but are not limited to, the following:

(a) Getting the effect of a higher price by changing the credit practices from what they were in March 1942. This includes decreasing credit periods, or making greater charges for extension of credit.

(b) Refusing to sell except in small quantities, or with or without delivery under circumstances which bring the

seller an extra return.

(c) Wrongly grading used lumber for which maximum prices are fixed in this order; or incorrectly or incompletely recording the information required by sec-

tion 9 to be set forth on the sales slip, receipt or other evidence of sale.

(d) Quoting a gross price above the maximum price, even if accompanied by a discount, the effect of which is to bring the net price below the maximum.

(e) Charging, paying, or receiving a commission for the service of procuring, buying, selling, or locating used lumber covered by this order, or for any related service which does not involve actual physical handling of used lumber, if the commission plus the purchase price results in a total payment by the buyer of such used lumber which is higher than the maximum price permitted by this order. For the purpose of this order, a commission is any compensation, however designated, which is paid, wholly or in part, for the procurement of lumber, and which is based directly or indirectly on the quantity, price, or value of the lumber in connection with which the service is rendered.

SEC. 13. Penalties. (a) Any person violating any provision of this order is subject to the criminal penalties, civil enforcement actions, suits for treble damages and proceedings for suspension of license provided for in the Emergency Price Control Act of 1942, as amended.

(b) Any person making a sale of used lumber covered by this order for which the total price is higher than \$5 and who either fails to give the buyer a sales slip, paid bill, receipt, or other evidence of sale, or although such document is given, fails to set forth in it the information required to be set forth by section 9, so that a determination can be made as to whether or not the price charged was proper, shall be limited to making a charge of \$5 per M'BM for all lumber delivered under such sale. The application or enforcement of this provision to a sale or against a seller shall not exclude the application or enforcement of the penalties provided in paragraph (a) of this section.

Article V-Maximum Prices

SEC. 14. Ceiling prices for any category of used lumber for which maximum prices are not fixed in this order are subject to the General Maximum Price Regulation unless subsequently fixed by regional or district order.

SEC. 15. Maximum prices-(a) Local sales out of seller's established yard. The maximum prices set forth in the table appearing in Appendix "A" shall apply to all sales of used lumber of the categories covered by this order, when the used lumber, at the time the order is taken, is part of a stock at the seller's established yard, and delivery is made either at the yard, or by truck, within a radius of thirty miles of such yard. If rail shipment either by the seller or buyer should be made, see paragraph (c) (2) of this section.

(b) Local sales from site other than the seller's established yard. When a sale is made for delivery from stock located at a site other than the seller's established yard, and delivery is made either at the site, or by truck within a

radius of thirty miles of such site, the maximum prices applicable to such sale shall be \$2.00 per M'BM less than the prices set forth in Appendix "A". If rail shipment either by the seller or buyer should be made, see paragraph (c) (2) of this section.

(c) Other than local sales—(1) When delivery is by truck. When a sale is made for delivery by truck to the buyer at a point located further than thirty miles from the place where the shipment originates, the maximum price applicable to such sale shall be \$5 per M'BM less than the price fixed for a local sale from such place under paragraph (a) or (b) above.

(2) When rail transportation is in-When a sale is made which involved. volves shipment by rail of used lumber, either by the buyer or seller, from the seller's established yard or from a site other than such yard, the maximum price applicable to such sale shall be \$5 per M'BM less than the price fixed for a local sale from such place under paragraphs (a) and (b) above.

SEC. 16. Additions for delivery. (a) If the buyer requests delivery within a free delivery zone which the seller recognized during March 1942, the seller may not charge for making the delivery. If delivery is requested and refused, the maximum price must be reduced by the actual cost incurred by the purchaser for making the delivery.

(b) If the buyer requests delivery out-

side the free delivery zone which the seller recognized during March 1942, the seller may add a charge for delivery as

follows:

(1) Where delivery is by common or contract carrier, the actual amount paid to the carrier by the seller may be

charged.

- (2) Where delivery up to 100 miles is by truck owned or controlled by the seller, the amount added for delivery may not be higher than 10 cents per M'BM for each mile from point of origin to place of delivery, but not for any part of the return trip. When truck delivery over 100 miles is to be made, the addition may not be more than 10 cents per M'BM for each mile from the point of origin to the nearest possible point of rail loading-out plus the amount of rail transportation from there to destination.
- (3) A minimum charge of 75 cents may be made on any delivery, where the permissible charges do not amount to 75
- (c) If the buyer elects to take delivery at the site of the lumber or at the seller's established yard, no reduction in price shall be required for that reason. This does not, however, affect the application of the provisions of section 15 (b).

This order may be amended, modified or revoked at any time.

This order shall be effective October 15, 1945.

Issued: September 26, 1945.

can approach it within a distance of two feet. One other copy must be kept available so that it may be shown to and read by any customer at his request.

SEC. 9. Sales slips and receipts. Where a sale of used lumber is covered by this order and the total price of the sale is \$5 or more, the seller shall, regardless of his previous practice and whether or not requested by buyers, give to the buyer a sales slip, bill, receipt, or other written evidence of the sale, setting forth the following:

Name and address of seller.

This applies to changes in credit practices and cash discounts and to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade under-standings and the like. Such practices include, but are not limited to, the following

(a) Getting the effect of a higher price by changing the credit practices from what they were in March 1942. This includes decreasing credit periods, or making greater charges for extension of credit.

(b) Refusing to sell except in small quantities, or with or without delivery under circumstances which bring the seller an extra return.

(c) Wrongly grading used lumber for which maximum prices are fixed in this order; or incorrectly or incompletely re-cording the information required by section 9 to be set forth on the sales slip, receipt or other evidence of sale.

(d) Quoting a gross price above the maximum price, even if accompanied by a discount, the effect of which is to bring the net price below the maximum.

(e) Charging, paying or receiving a commission for the service of procuring, buying, selling, or locating used lumber covered by this order, or for any related service which does not involve actual physical handling of used lumber, if the commission plus the purchase price results in a total payment by the buyer of such used lumber which is higher than the maximum price permitted by this order. For the purpose of this order, a commission is any compensation, however designated, which is paid, wholly or in part, for the procurement of lumber, and which is based directly or indirectly on the quantity, price or value of the lumber in connection with which the service is rendered.

SEC. 13. Penalties. (a) Any person violating any provision of this order is subject to the criminal penalties, civil enforcement actions, suits for treble damages and proceedings or suspension of license provided for in the Emergency Price Control Act of 1942, as amended.

(b) Any person making a sale of used lumber covered by this order for which the total price is higher than \$5 and who either fails to give the buyer a sales slip. paid bill, receipt, or other evidence of sale, or although such document is given, fails to set forth in it the information required to be set forth by section 9, so that a determination can be made as to whether or not the price charged was proper, shall be limited to making a charge of \$5 per M'BM for all lumber delivered under such sale. The application or enforcement of this provision to a sale or against a seller shall not exclude the application or enforcement of the penalties provided in paragraph (a) of this section.

Article V-Maximum Prices

Sec. 14. Ceiling prices for any category of used lumber for which maximum prices are not fixed in this order are subject to the General Maximum Price Regulation unless subsequently fixed by regional or district order.

SEC. 15. Maximum prices-(a) Local sales out of seller's established yard. The maximum prices set forth in the table appearing in Appendix "A" shall apply to all sales of used lumber of the categories covered by this order, when the used lumber, at the time the order is taken, is part of a stock at the seller's established yard, and delivery is made either at the yard, or by truck, within a radius of thirty miles of such yard. If rail shipment either by the seller or buyer should be made, see paragraph (c) (2) of this section.

(b) Local sales from site other than the seller's established yard. When a sale is made for delivery from stock located at a site other than the seller's established yard, and delivery is made

either at the site, or by truck within a radius of thirty miles of such site, the maximum prices applicable to such sale shall be \$2.00 per M'BM less than the prices set forth in Appendix "A". If rail shipment either by the seller or buyer should be made, see paragraph (c) (2) of this section.

(c) Other than local sales—(1) When delivery is by truck. Sec. 16. Additions for delivery. (a) If the buyer requests delivery within a free delivery zone which the seller recognized during March 1942, the seller may not charge for making the delivery. If delivery is requested and refused, the maximum price must be reduced by the actual cost incurred by the purchaser for making the delivery.

(b) If the buyer requests delivery outside the free delivery zone which the seller recognized during March 1942, the seller may add a charge for delivery as

follows:

(1) Where delivery is by common or contract carrier, the actual amount paid to the carrier by the seller may be

charged.

(2) Where delivery up to 100 miles is by truck owned or controlled by the seller, the amount added for delivery may not be higher than 10 cents per M'BM for each mile from point of origin to place of delivery, but not for any part of the return trip. When truck delivery over 100 miles is to be made, the addition may not be more than 10 cents per M'BM for each mile from the point of origin to the nearest possible point of rail loading-out plus the amount of rail transportation from there to destination.

(3) A minimum charge of 75 cents may be made on any delivery, where the permissible charges do not amount to 75

cents.

(c) If the buyer elects to take delivery at the site of the lumber or at the seller's established yard, no reduction in price shall be required for that reason. This does not, however, affect the application of the provisions of section 15 (b).

This order may be amended, modified or revoked at any time.

This order shall be effective October 15, 1945.

Issued September 26, 1945.

2. Wisconsin Power and Light Company proposes to issue and sell to certain banks \$3,800,000 principal amount of 2%, Serial Notes, (5% after maturity) payable semi-annually over a period of seven years and to apply the proceeds from the sale of such notes, together with other funds of the company, to the payment and retirement of all its outstanding Serial Notes in the aggregate principal amount of \$4,070,000 maturing serially to August 1, 1951 and bearing interest at 21/4%, 23/4% and 3%.

Notice is hereby given that a declaration or application (or both) has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by Cape & Vineyard Electric Company, a subsidiary of New England Gas and Electric Association, a regis-

tered holding company; and

Notice is further given that any interested person may, not later than October 31, 1945, at 5:30 p. m., E. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. In accordance with an agreement made on September 14, 1945, by and between Cape & Vineyard Electric Company and John Hancock Mutual Life Insurance Company it is proposed to reduce the interest rate on the First Mortgage Bonds, Series B. due March 1, 1968, of Cape & Vineyard Electric Company from 4% per annum to 31/8% per anmum, effective as of September 1, 1945. There are issued and outstanding \$1 .-000,000 aggregate principal amount of Series B bonds due March 1, 1968, all of which are owned and held by the insurance company.
